About EMS

Emergency Management Services (EMS) is an Australian company providing specialist emergency response, risk management training and consultancy to industry streams including health care, manufacturing, mining, hospitality, retail as well as the public sector.

Our Instructors

All our Instructors and Consultants have first hand operational front line Emergency Management experience and expertise, providing an unparalleled depth and quality to training. It's easy to put your trust in those that manage real world emergencies, every day.

Our Reputation

Our reputation is built on dedication and commitment to provide outstanding service to our clients with an emphasis on practical training and live scenarios. Our strength lies not only in the quality of training but in understanding the client's obligations and tailoring to meet the clients specific needs.

Our Guarantee

We take pride in our training and the quality of our service and therefore offer a 100% money back guarantee for all of our courses.

Training 24 X 7

Emergencies don't only occur during business hours... Our training doesn't either. Our Instructors are available seven days per week to conduct training at a time convenient to you.

Contact us at www.emserv.net.au or by calling 1300 133 302

EMS's consultative approach and service driven culture fosters strong relationships with clients. Instructors are selected for their strong operational experience in the field in addition to their energy and passion for training.

Robust risk management practices are embedded in the service offerings with an emphasis on our Client's emergency readiness. These together, with a highly skilled and committed team are key drivers in EMS's success.

CEO, Emergency Management Services

Occupational Health and Safety

- Manual Handling
- Manual Handling for Health Care

Emphasis on hands on training with practical training tools to develop staff competence and confidence. Scenario based learning provides realism and opportunities to apply skills whilst being supervised by professionals in a monitored environment.

Australian Standard 3745 states that emergency training should be conducted at intervals not exceeding six months

Emergency Readiness Assessment

Emergency Management Services offer a unique assessment of your premises providing a current snapshot of your organisations "Emergency Readiness".

Following on we then conduct a gap analysis highlighting areas where attention is required and can also provide a plan to enable you to meet the requirements.

This is not just another building inspection but a complete assessment of compliance and competence in regards to your procedures, your staff and your organisations "Emergency Readiness"

- Are we meeting our compliance obligations?
- Is our staff training effective?
- Would our staff, our equipment and our procedures perform in the event of an emergency?

Book your ERA today on 1300 133 302

Are you a Medical Facility?

Medical facilities including Hospitals, Nursing Homes and other places of care require special procedures due to unique risks associated with their environments. Specific standards apply to Health Care facilities and therefore distinct training is required.

Emergency Management Services offers tailored training, compliant with AS 4083 to meet the specific needs of the Health Care Industry.

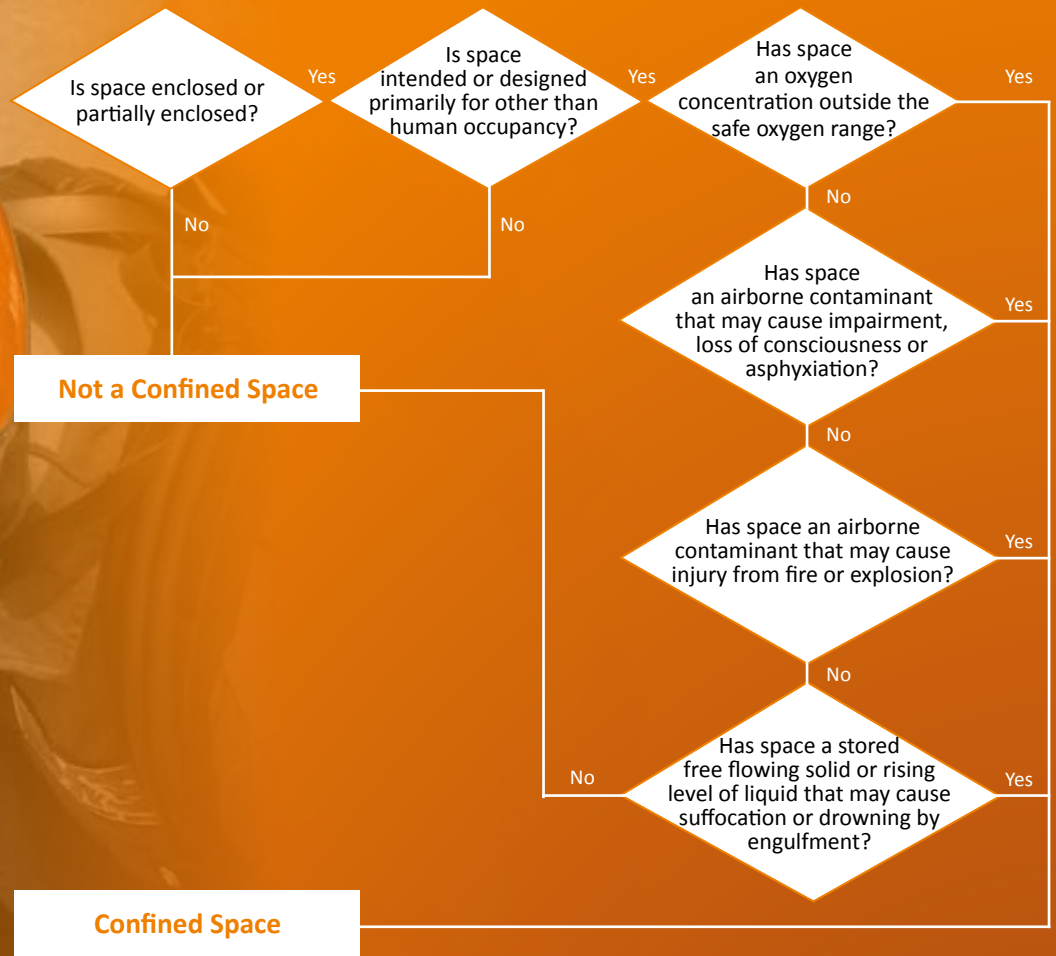

Medical Emergency Response Training

- Emergency Response for Occupants and Wardens
- Fire Safety Officer
- Patient Removal Techniques
- Practical Evacuation
- Emergency Simulations for wards and operating theatres (half day or full day)

Confined Space

Is My Space a Confined Space?

OH&S Legislation requires Employers to provide training for all persons who are required to work in or on a confined space in all relevant activities relating to entering and working in or on the confined space.

Confined Space Training

- Confined Space Awareness
- Confined Space Entry
- Confined Space Rescue
- Breathing Apparatus
- Atmospheric Monitoring
- Industry Skill Sets

EMS distributes a full range of Confined Space equipment at highly competitive prices.

Our courses are run on site, either during or after business hours, depending on your company's needs. All courses can be separated into sessions, to accommodate shifts where necessary.

Height Safety

Working at heights is not dangerous It's falling that's dangerous....

That's why fall prevention training is mandatory for any worker operating where there is a risk of falls.

Emergency Management Services provides a range of height safety training including Safe Working on Roofs and Safe Working at Heights covering both the resource and manufacturing sectors as well as the construction industry.

Height Safety Training

- Safe Working at Heights
- Safe Working on Roofs
- Fall Restraint Techniques
